Meyer Najem Launches New & Improved Website

(Fishers, IN) January 3, 2011 – Meyer Najem is pleased to announce our new and improved website. Our goal is to provide our visitors with a more visual and interactive experience. The upgraded site features a new media section with video testimonials from our clients, a portfolio demonstrating our market experience through an updated design, and a subcontractor portal to forms and bid information. The updated subcontractor resources page now contains information for estimating, subcontractor prequalification, safety, accounting, and our diversity program. Subcontractors and vendors can now use Meyer Najem's website to find information about what projects are out to bid, how to obtain plans, download prequalification and accounting forms, and access safety information including OSHA 10-and 30-hour training classes.

In addition to the site's many new technical features, the graphic design and interface present a dramatic improvement. We have streamlined the site's navigation, making it more intuitive and user-friendly. We also created a visual navigation system for the many visitors who simply want to browse the site without a specific destination. We think this dual presentation will allow our "power users" the ease and efficiency of rapidly getting to their resources, while simultaneously inviting many new users to learn more about Meyer Najem and our services by casually browsing through articles, media, and archives.

Meyer Najem Construction is one of the leading construction managers and contractors in the region, with an emphasis in Healthcare and Institutional Markets.

BUILDING VALUE. BUILDING SOLUTIONS.
